

PARAS KAUSHIK

AI Engineer | Computer Vision | LLM | RAG | VLM Fine-tuning • +91 9215460007 • paraskaushik862@gmail.com
• [linkedin.com/in/paraskaushik07](https://www.linkedin.com/in/paraskaushik07)

PROFESSIONAL SUMMARY

AI Engineer with production-grade expertise in **Computer Vision**, **LLM/VLM fine-tuning**, and **RAG systems**. Architect of **GradeSmith** – a national-scale AI grading platform – and co-founder of **Flashr**, an AI-native EdTech product for competitive exam preparation. Deep experience in **handwritten OCR**, **agentic AI orchestration**, **GPU-efficient deployment**, and **multimodal model fine-tuning**. Proven track record for inference cost reductions and measurable accuracy improvements while translating complex AI research into real-world production systems.

TECHNICAL SKILLS

AI/ML: Computer Vision, OCR, Layout Parsing, LLMs, VLMs, RAG, Agentic AI, VLM Fine-tuning (SFT, RFT, GRPO), NLP; **Libraries:** PyTorch, TensorFlow, LangChain, LlamaIndex, FAISS, OpenCV, Hugging Face, YOLO, vLLM, Sentence Transformers, Pipecat; **Deployment:** FastAPI, Docker, AWS, GCP, RunPod (GPU), Vast.ai, Streamlit, CI/CD, Cloudflare; **APIs:** OpenAI, Gemini, IBM Watson, STT/TTS

PROFESSIONAL EXPERIENCE

AI Engineer | Infutrix

Jun 2025 – Present | Mohali, India

- **GradeSmith – AI Automated Grading System:** Architected an end-to-end **OCR-based grading pipeline** processing **100,000+ answer sheets across 20+ subjects**, deployed across large universities and schools in India. Fine-tuned **Qwen-VL** for handwritten answer mapping and semantic extraction; fine-tuned **YOLO** for cutting/strikethrough detection to identify invalidated content. Achieved **97.5% OCR accuracy** while reducing per-sheet inference cost by **80%**.
- Engineered **agentic multi-step LLM reasoning** pipelines for complex subjective evaluation; built automated rubric-scoring workflows adaptable across academic institutions.
- Built **Hirefl.ai** – an AI-driven recruitment platform with **LLaMA-based resume parsing & screening**, real-time **STT/TTS voice interview engine**, automated scoring, and **FastAPI** deployment – cutting HR workload by **70%**.

AI & Cloud Computing Intern | AICTE Edunet Foundation

Jul 2024 – Aug 2024 | Remote, India

- Built a **production-deployed conversational AI chatbot** using **IBM Watson Assistant** with intent classification, entity recognition, and scalable cloud architecture on IBM Cloud infrastructure.

Data Analyst Intern | Dataplay

Jun 2024 – Jul 2024 | Remote, India

- Developed interactive **Power BI dashboards** delivering actionable business insights; led a cross-functional project team and drove **data-informed decision-making** for key stakeholders.

EDUCATION

B.Tech in Computer Science Engineering – MAIT, Baddi

Jun 2021 – Jun 2025

CGPA: **9.23**

KEY PROJECTS

Flashr – AI-Native Study Platform for Competitive Exams

Apr 2026 - Present

- Co-founded **flashrapp.in** – an **AI-native study platform** for UPSC, GATE, CAT, NEET, and JEE. Built an **intelligent ingestion pipeline** converting PDFs, images, and handwritten notes into **adaptive flashcards and MCQs** via fine-tuned LLMs. Features **spaced repetition**, a **multiplayer duel arena**, and subject-wise smart organization.

KAIROS – Multi-Agent AI Productivity Platform

Jun 2024 – Nov 2024

- Architected **KAIROS** – a modular, **multi-agent AI platform** integrating a **fine-tuned conversational engine** for multi-document Q&A, a **real-time STT/TTS voice assistant (PRINCE)**, OCR-based document intelligence, multilingual translation, and automated QR workflows. Unified **7+ AI capabilities** under an extensible agent architecture – accelerating knowledge workflows by **40%+**.

Qwen-VL Handwriting OCR – Fine-tuned VLM for Noisy Documents

May 2025 – Jun 2025

- Fine-tuned **Qwen-3-VL-8B** on a **custom-annotated handwriting dataset** with end-to-end data preparation and augmentation pipeline; achieved **8% CER** on real-world noisy documents – establishing a robust baseline for production handwritten OCR.

ACHIEVEMENTS & LEADERSHIP

AI Summit 2026, Delhi: Presented GradeSmith to **500+ industry professionals and academic leaders** – recognized for innovation in AI-driven education assessment.

Smart India Hackathon (SIH): Proposed **Track-VAHAN**, an IoT-based vehicular accident detection and emergency alert system using GPS, GSM, and onboard sensors.

Ideathon – 1st Place: Designed a **Tongue Driven System (TDS) wheelchair**; secured first place for innovation and technical excellence.

CERTIFICATIONS

Deep Learning Specialization (Andrew Ng) • **Machine Learning Specialization** (Andrew Ng) • **Google Data Analyst Professional Certificate** • **Data Structures & Algorithms Specialization**
